### Category 1 - PROFESSIONAL ATTENDANC

23 ⓘ (.popoverContent)

#### Group

A1 - General Practitioner Attendances To Which No Other Item Applies

#### Subheading

2 - Level B

Professional attendance by a general practitioner at consulting rooms (other than a service to which another item in this Schedule applies), lasting at least 6 minutes and less than 20 minutes and including any of the following that are clinically relevant:

- (a) taking a patient history;
- (b) performing a clinical examination;
- (c) arranging any necessary investigation;
- (d) implementing a management plan;
- (e) providing appropriate preventive health care;

for one or more health-related issues, with appropriate documentation

**Fee:** \$45.05 **Benefit:** 100% = \$45.05

AN.0.9

Using time-tiered professional (general) attendance items

Publication Date: 1 November 2025

#### SUMMARY

This note sets out the key common principles that apply when using the time-tiered professional attendance (also referred to as general attendance, time-tiered attendance, and Level A-E attendance) MBS items for general practitioners (GPs), medical practitioners (who are not GPs) and prescribed medical practitioners (i.e. medical practitioners who are not GPs, specialists or consultant physicians). These items are usually claimed in a general practice setting.

Unless otherwise stated these principles apply to all general attendance items, regardless of location (in consulting rooms, out of consulting rooms or residential aged care facilities), time (business or after-hours), or mode (face to face or video or phone). For some categories of attendances e.g. telehealth (video or phone) additional requirements may apply.

**Note:** that within the general practice context, prescribed medical practitioners and medical practitioners who are not GPs are sometimes referred to as Other Medical Practitioners (OMPs) or non-vocationally registered (non-VR) GPs. References to OMPs in this Explanatory Note include both prescribed medical practitioners and medical practitioners who are not GPs.

Information on the definition of a GP for Medicare purposes is available in [GN.4.13](#)

(<https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=GN.4.13&qt=noteID&criteria=gn%2E4%2E13>) and prescribed medical practitioners in [AN.7.1](#)

(<https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.7.1&qt=noteID>).

Tables setting out the item numbers for the various time-tiers and locations, times of day and modes are available in Note [AN.0.74](#)

(<https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.0.74&qt=noteID&criteria=AN%2E0%2E74>) for GPs, and [AN.7.2](#)

(<https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.7.2&qt=noteID&criteria=an%2E7%2E2>) for OMPs.

#### USE OF THE ITEMS

General attendance items are claimed for a professional attendance when no other MBS item applies. It is a general principle of the MBS that the item that best describes the service is the item that should be claimed. This means that where a more specific MBS items exists (for example a skin biopsy under MBS item 30071), the more specific item should be claimed. If no other MBS item accurately reflects the service provided, and the requirements of a general attendance item are met, the general attendance item is claimed.

General attendance items generally require that the medical practitioner attends the patient and does *at least* one of the following:

- taking a patient history
- performing a clinical examination
- arranging any necessary investigation
- implementing a management plan

- providing appropriate preventive health care.

Appropriate and contemporaneous records must be kept.

The time-tiers range from Level A short consultation for straightforward tasks to 60+ minute Level E consultations.

General attendance items are both professional and personal attendances.

### **What is a professional attendance?**

The Regulations state that a professional attendance includes the *"provision, for a patient, of any of the following services:*

- *evaluating the patient's condition or conditions including, if applicable, evaluation using a health screening service mentioned in subsection 19(5) of the [Health Insurance] Act*
- *formulating a plan for the management and, if applicable, for the treatment of the patient's condition or conditions*
- *giving advice to the patient about the patient's condition or conditions and, if applicable, about treatment*
- *if authorised by the patient—giving advice to another person, or other persons, about the patient's condition or conditions and, if applicable, about treatment*
- *providing appropriate preventive health care*
- *recording the clinical details of the service or services provided to the patient."*

Further information on professional attendances is at [AN.0.3](https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.0.3&qt=noteID&criteria=an%2E0%2E3) (https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.0.3&qt=noteID&criteria=an%2E0%2E3).

### **What is a personal attendance?**

The Regulations specify that personal attendance items *"apply to a service provided in the course of a personal attendance by a single medical practitioner on a single patient on a single occasion."* This means that:

- the patient must be present and only time spent with the patient counts towards the attendance
- another health practitioner (e.g. a practice nurse) cannot provide the service on behalf of a medical practitioner
- benefits are not payable if more than one medical practitioner provides an attendance on the same patient at the same time.

In the case of telehealth (video and phone) attendances this requirement is modified to be "a service that is an attendance by a single health professional on a single person".

A guide on substantiating a patient's attendance is available on the [Department of Health, Disability and Ageing's website](#) .

Further information on personal attendances is at [AN.0.1](https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.0.1&qt=noteID&criteria=an%2E0%2E1) (https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.0.1&qt=noteID&criteria=an%2E0%2E1).

### **How do I choose which general attendance item to use?**

The correct general attendance item will depend on:

- practitioner type – GP, medical practitioner (excluding GPs) or prescribed medical practitioner
- length of time spent with the patient (i.e. the personal attendance time)

- location of the consultation – in consulting rooms, out of consulting rooms or residential aged care facility
- time of the consulting – business or after-hours
- mode of the consultation – face to face, phone or video, and
- for prescribed medical practitioners only – the location (by Modified Monash area) of the practice.

Reference tables setting out the relevant general attendance items are available at [AN.0.74](#)

(<https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.0.74&qt=noteID&criteria=AN%2E0%2E74>) for GPs and [AN.7.2](#)

(<https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.7.2&qt=noteID&criteria=an%2E7%2E2>) for OMPs.

### **Can I address more than one issue in a general attendance?**

Yes. All general attendance items can be claimed to address multiple issues with a patient.

When multiple issues are addressed in a single consultation, and more specific MBS items do not apply for any of these issues, medical practitioners should use the appropriate MBS general attendance item for the total time of the consultation. In these circumstances, medical practitioners should not claim each issue as a separate attendance.

### **What activities count towards the consultation time?**

Only time spent with the patient (or on the telephone/video conference with the patient in the case of telehealth) performing clinically relevant tasks can be included in the consultation time.

Clinically relevant tasks include, but are not limited to:

- undertaking any of the activities described in the item descriptor
- communicating with the patient (and where relevant their carer)
- writing clinical notes, prescriptions or referrals, completing forms, reports or other paperwork relating to the patient while the patient is present
- reviewing, creating or updating entries in the patient's My Health Record while the patient is present.

Time taken to write clinical notes, complete forms, reports or other paperwork, upload records in My Health Record (or other systems), or talk to carers or relatives when the patient is not present cannot be included in the consultation time.

### **If the patient has particular needs that mean good communication takes longer than average can this time be included?**

Yes, communicating effectively with patients is crucial to achieving clinical outcomes and a key part of a clinical service. A wide range of factors may affect the time needed to communicate effectively with a patient during a consultation. These include, but are not limited to, situations where a language barrier exists between the medical practitioner and patient (including when an interpreter is required), or when a patient has hearing problems, difficulty with speech, an intellectual disability, and/or dementia.

When claiming for time-tiered MBS items, the total consultation time includes the time required to communicate effectively with the patient. Where more time than usual is required to communicate effectively with a particular patient, it is considered reasonable to claim a longer attendance item than might otherwise be expected for the service. This applies to both face to face and telehealth services.

In such situations, medical practitioners and other providers should make a brief record in the patient's notes including details about why the additional time was required. For example, stating 'consultation extended due to use of interpreter' and, if relevant, citing the Translating and Interpreting Service (TIS) job number.

### **Can I provide another medical service that is not a general attendance (e.g. a procedure or diagnostic test) and a general attendance to the same patient on the same day?**

In general, yes. However, there are some limitations including:

- both services must be clinically relevant and distinct services
- the other item must not have restrictions on same day claiming as a general attendance item, and
- the other item is not listed in MBS Group T6 (Anaesthetics) or T9 (Assistance at Operation).

Where more than one service is provided to a patient on the same day, the time taken for the second service (e.g. a procedure) must not be included in the consultation time for the general attendance.

Procedural items include all necessary components required to provide the service. This would include obtaining informed procedural and financial consent, the procedure itself, a discussion of the results of the procedure and (unless stated otherwise) the provision of routine aftercare.

Where the results of a procedure inform a further consultation on management, the consultation may be eligible for a Medicare benefit.

#### **Can I provide more than one general attendance service to the same patient on the same day?**

Yes, provided that the subsequent attendance is not a continuation of the first attendance, both services are clinically relevant and distinct, and the item requirements are met for both attendances. Further information is available in [AN.0.7](https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.0.7&qt=noteID) (https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.0.7&qt=noteID).

#### **Are there specific requirements for any of the general attendance items?**

Yes, several general attendance items have additional, specific requirements:

- Telehealth (video and phone) – patients can only access these services through their “eligible telehealth practitioner” with limited exemptions, or through MyMedicare with the patient’s registered practice. See [AN.1.1](https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.1.1&qt=noteID) (https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.1.1&qt=noteID) for further information. Some longer telephone items require the patient to be registered with MyMedicare and can only be claimed at their registered practice.
- After-hours attendance items – can only be claimed in specific time periods. See [AN.0.19](https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.0.19&qt=noteID&criteria=an%2E0%2E19) (https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.0.19&qt=noteID&criteria=an%2E0%2E19) (GPs) and [AN.7.24](https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.7.24&qt=noteID&criteria=an%2E7%2E24) (https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.7.24&qt=noteID&criteria=an%2E7%2E24) (OMPs) for further information.
- Out of consulting rooms attendance items – have derived fee structures that vary with the number of patients attended or, in the case of some residential aged care facilities items, may be co-claimed with a flag fall item. See [AN.0.11](https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.0.11&qt=noteID&criteria=an%2E0%2E11) (https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.0.11&qt=noteID&criteria=an%2E0%2E11) (derived fees) and [AN.35.1](https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.35.1&qt=noteID&criteria=an%2E35%2E1) (https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.35.1&qt=noteID&criteria=an%2E35%2E1) and [AN.35.2](https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.35.2&qt=noteID) (https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.35.2&qt=noteID) (flag falls) for further information.
- Residential aged care facility items – See [AN.0.15](https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.0.15&qt=noteID&criteria=an%2E0%2E15) (https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.0.15&qt=noteID&criteria=an%2E0%2E15), [AN.35.1](https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.35.1&qt=noteID&criteria=an%2E35%2E1) (https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.35.1&qt=noteID&criteria=an%2E35%2E1) and [AN.35.2](https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.35.2&qt=noteID) (https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.35.2&qt=noteID) for further information.
- Items 179, 185, 189, 203, 301, 91906, 91916, 19794, 91806, 91807, 91808, 91926 – can only be claimed when the service is provided at a practice located in a Modified Monash 2-7 area. Practice locations can be checked on the [Health Workforce Locator](#) .

#### **Can I claim a general attendance for providing aftercare?**

No, you cannot claim a general attendance item if you performed the procedure that resulted in the need for aftercare.

However, the [Health Insurance \(Subsection 3\(5\) General Practitioner Post-Operative Treatment\) Direction 2017](#)  allows a medical practitioner working in general practice to use a general attendance item to provide aftercare provided that they did not perform the initial service that caused the need for aftercare. See [AN.0.71](https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.0.71&qt=noteID&criteria=an%2E0%2E71) (https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.0.71&qt=noteID&criteria=an%2E0%2E71) for further information.

#### **ELIGIBLE PATIENTS**

Any patient who is eligible to receive Medicare benefits is eligible for face to face (in consulting rooms and out of consulting rooms) general attendance items (business hours or after-hours)

Residential aged care facility-specific items are only available to Medicare-eligible patients that are residents of a residential aged care facility.

Patients must meet the “eligible telehealth practitioner” requirement to access video and phone items, unless an exemption applies (see [AN.1.1](#) (<https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.1.1&qt=noteID>) for more information). In the case of telephone items 91900, 91903, 91906, 91910, 91913, 91916, the patient must also be registered with the practice providing the service through MyMedicare.

## ELIGIBLE PRACTITIONERS

General attendance items are available for different practitioner types:

- general practitioner items can be claimed by general practitioners only (see [GN.4.13](#) (<https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=GN.4.13&qt=noteID&criteria=gn%2E4%2E13>)).
- medical practitioner items can be claimed by any medical practitioner that is not explicitly excluded in the relevant item descriptor.
- prescribed medical practitioner items can be claimed by prescribed medical practitioners only (see [AN.7.1](#) (<https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.7.1&qt=noteID&criteria=an%2E7%2E1>)).

## CO-CLAIMING RESTRICTIONS

To co-claim a general attendance item and another item both services must be clinically relevant and distinct services.

General attendance items and chronic condition management items 392, 393, 965, 967, 92029, 92030, 92060 and 92061 cannot be claimed on the same day for the same patient. This restriction is set out in clause 2.16.11 of the [Health Insurance \(General Medical Services Table\) Regulations 2021](#) [↗](#).

Further information on co-claiming of general attendance items and other MBS items is available in the [AskMBS Advisory – General Practice Services #2](#) [↗](#).

## RECORD KEEPING AND REPORTING REQUIREMENTS

The department undertakes regular post payment auditing to ensure that MBS items are claimed appropriately. Practitioners should ensure they keep adequate and contemporaneous records. For information on what constitutes adequate and contemporaneous records see [GN.15.39](#) (<https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=GN.15.39&qt=noteID&criteria=GN%2E15%2E39>).

## RELEVANT LEGISLATION

Details about the legislative requirements of the MBS item(s) can be found on the Federal Register of Legislation at [www.legislation.gov.au](http://www.legislation.gov.au) [↗](#). Attendance items are set out in three regulatory instruments:

- [Health Insurance \(Section 3C General Medical Service – Other Medical Practitioner\) Determination 2018](#) [↗](#) – items 733, 737, 741, 745, 761, 763, 766, 769, 772, 776, 788, 789, 2197, 2198, 2200
- [Health Insurance \(Section 3C General Medical Services – Telehealth Attendances\) Determination 2021](#) [↗](#) – video and phone attendance items.
- [Health Insurance \(General Medical Services Table\) Regulations 2021](#) [↗](#) – all other attendance items.

Related Items: [3](#) (<http://www9.health.gov.au/mbs/fullDisplay.cfm?type=item&qt=ItemID&q=3>) [4](#) (<http://www9.health.gov.au/mbs/fullDisplay.cfm?type=item&qt=ItemID&q=4>) [23](#) (<http://www9.health.gov.au/mbs/fullDisplay.cfm?type=item&qt=ItemID&q=23>) [24](#) (<http://www9.health.gov.au/mbs/fullDisplay.cfm?type=item&qt=ItemID&q=24>) [36](#) (<http://www9.health.gov.au/mbs/fullDisplay.cfm?type=item&qt=ItemID&q=36>) [37](#) (<http://www9.health.gov.au/mbs/fullDisplay.cfm?type=item&qt=ItemID&q=37>) [44](#) (<http://www9.health.gov.au/mbs/fullDisplay.cfm?type=item&qt=ItemID&q=44>) [47](#) (<http://www9.health.gov.au/mbs/fullDisplay.cfm?type=item&qt=ItemID&q=47>) [52](#) (<http://www9.health.gov.au/mbs/fullDisplay.cfm?type=item&qt=ItemID&q=52>) [53](#) (<http://www9.health.gov.au/mbs/fullDisplay.cfm?type=item&qt=ItemID&q=53>) [54](#) (<http://www9.health.gov.au/mbs/fullDisplay.cfm?type=item&qt=ItemID&q=54>) [57](#) (<http://www9.health.gov.au/mbs/fullDisplay.cfm?type=item&qt=ItemID&q=57>) [58](#)

[illegible]

AN.0.73

Attendance services for eligible disabilities

**Intention and eligibility of this service under item 139 and video equivalent item 92142**

Items 139 or video equivalent item 92142 are intended for diagnosis and treatment for patients under 25 years of age with an eligible disability by a general practitioner.

**Definition of Eligible Disabilities is found AR.29.1**

The intention of this service is to provide access to treatment, through the development of a treatment and management plan by a general practitioner, for individuals under 25 years of age, diagnosed an eligible disability. The development of the treatment and management plan follows a comprehensive medical assessment, and provides the opportunity to refer to eligible allied health practitioners for up to a total of 20 MBS treatment services per patient's lifetime (items 82015, 82020, 82025, 82035, 93035, 93036, 93043 or 93044). This item is claimable once in a patient's lifetime.

**Diagnostic assessment:**

Early identification of, and intervention for, individuals with eligible disabilities is important in promoting positive longer-term outcomes. Symptoms can cause clinically significant impairment in social, occupational or other important areas of functioning.

The assessment and diagnosis of an eligible disability should be evaluated in the context of both a physical and developmental assessment. The GP may require a number of separate attendances (through usual time-tiered or subsequent attendance items 3 to 47 or telehealth items 91790, 91800 to 91802 (video), 91890 and 91891 (phone) to complete a comprehensive accurate assessment and formulate a diagnosis, exclude other disorders or assess for co-occurring conditions.

**Multi-disciplinary assistance with assessment and/or contribution to the treatment and management plan:**

Depending on a range of factors, not limited to the patient's age and nature of suspected disabilities, the GP may require a multi-disciplinary approach to complete a comprehensive accurate assessment and formulate a diagnosis.

Where the GP determines the patient requires additional assessments to formulate a diagnosis, through the assistance of an allied health practitioner, they are able to refer the patient to an eligible allied health provider from standard attendance items 3 to 47 or telehealth items 91790, 91800 to 91802 (video), 91890 and 91891(phone).

Whilst Medicare benefits provide for a total of 8 allied health assessment services per patient per lifetime, an eligible allied health practitioner can only provide **up to 4 services** before the need for a review (the type of review can be specified in the referral to the eligible allied health professional) by the referring GP, who must agree to the need for any additional allied health services prior to the delivery of the remaining 4 allied health assessment services.

**Eligible allied health assessment practitioners include:**

- Psychologist (MBS item 82000, 93032, 93040)
- Speech pathologist (MBS item 82005, 93033, 93041)
- Occupational therapist (MBS item 82010, 93033, 93041)
- Audiologist, dietitian, exercise physiologist, optometrist, orthoptist, physiotherapist (MBS item 82030, 93033, 93041)

**Requirements of the referral to allied health practitioners**

The GP can refer to multiple eligible allied health practitioners concurrently, but a separate referral letter must be provided to each allied health practitioner. The referral should specify the intent of the assessment and if appropriate, specify the number of services to be provided. Where the number of sessions is not specified, each allied health practitioner can provide up to 4 assessment services without the need for review or agreement to provide further assessment services.

## **Review requirements following delivery of four (4) allied health assessment services**

Where an eligible allied health practitioner has provided 4 assessment services (through items 82000, 82005, 82010, 82030, 93032, 93033, 93040, or 93041) and considers additional assessment services are required, they must ensure the referring GP undertakes a review. If the type of review is not specified by the GP, an acceptable means of review includes: a case conference, phone call, written correspondence, secure online messaging exchange or attendance of the patient with the referring psychiatrist.

## **Inter-disciplinary allied health referral**

Eligible allied health practitioners are also able to make inter-disciplinary referrals to other eligible allied health practitioners as clinically necessary to assist with the formulation of the diagnosis or contribute to the treatment and management plan. Inter-disciplinary referrals must be undertaken in consultation and agreement with the referring GP. Whilst they do not require the need for an attendance with the patient (face-to-face/video/phone) by the referring GP, they do require an agreement from the referring GP. This can be undertaken (but is not limited to) an exchange by phone, written communication or secure online messaging.

## **Contribution to the Treatment and Management Plan through allied health referral**

In addition to referring to allied health practitioners for assistance with formulating a diagnosis, once the GP makes a diagnosis, the GP may require the contribution of an eligible allied health practitioner to assist with the development of the Treatment and Management plan (before billing item 139 or 92142).

MBS items 82000, 82005, 82010, 82030, 93032, 93033, 93040 or 93041 provide a dual function for this purpose. It is important to note that the service limit of a total of 8 services per patient per lifetime apply regardless of whether the items are used for assistance with diagnosis or contribution to the treatment and management plan, and the referring GP should be mindful of this when referring to eligible allied health practitioners.

## **Development of the Treatment and Management Plan**

Once the GP has made a diagnosis of an eligible disability, to complete the item requirements of item 139 or 92142 they must develop a treatment and management plan which includes:

- Written documentation of the patient's confirmed diagnosis of an eligible disability, including any findings of assessments performed (which assisted with the formulation of the diagnosis or contributed to the treatment and management plan)
- A risk assessment which means assessment of:
  - the risk to the patient of a contributing co-morbidity and
  - environmental, physical, social and emotional risk factors that may apply to the patient or to another individual.
- Treatment options which include:
  - Recommendations using a biopsychosocial model
  - Identifying major treatment goals and important milestones and objectives
  - Recommendation/s and referral for treatment services provided by eligible allied health practitioners (where relevant) and who should provide this, specifying number of treatments recommended (to a maximum of 20 treatment services)
  - Indications for review or episodes requiring escalation of treatment strategies
- Documenting the Treatment and Management plan and providing a copy to relevant allied health practitioner/s.

## **Referral for allied health treatment services**

Once a treatment and management plan is in place (after item 139 or 92142 has been claimed) the GP can refer the individual to eligible allied health practitioners for the provision of treatment services. Treatment services address the functional impairments identified through the comprehensive medical assessment which are outlined in the treatment and management plan. Treatment services focus on interventions to address developmental delays/disabilities or impairments.

## **Eligible allied health treatment practitioners include:**

- Psychologist (MBS items 82015, 93035, 93043)
- Speech pathologist (MBS items 82020, 93036, 93044)
- Occupational therapist (MBS items 82025, 93036, 93044)
- Audiologist, dietitian, exercise physiologist, optometrist, orthoptist, physiotherapist (MBS items 82035, 93036, 93044)

A total of 20 allied health Treatment services per patient per lifetime are available through the MBS, which may consist of any combination of items 82015, 82020, 82025 or 82035 or equivalent video items. Whilst the GP can refer to multiple eligible allied health practitioners concurrently, a separate referral letter must be provided to each allied health practitioner.

The referral should specify the goals of the treatment and if appropriate, the specify the number of services to be provided. It is the responsibility of the referring psychiatrist to allocate the number of treatment services (up to a maximum of 10 services per course of treatment) in keeping with the individual's treatment and management plan.

It is important to note, that a benefit will not be paid for the MBS allied health Treatment services unless the pre-requisite items (139 or 92142) have been processed through the Medicare claiming system.

On the completion of a "course of treatment" (specified by the referring GP, up to maximum of 10 services), the eligible allied health practitioner must provide a written report to the referring GP, which should include information on the treatment provided, recommendations on future management of the individual's disorder and any advice to caregivers (such as parents, carers, schoolteachers). This written report will inform the referring GPs decision to refer for further treatment services. Where subsequent courses of treatment after the initial 10 services are required (up to a maximum of 20 services per patient per lifetime) a new referral is required.

## Category 8 - MISCELLANEOUS SERVIC

MN.10.1

Assessment to assist with Diagnostic Formulation and Contribution to a Treatment and Management Plan by Eligible Allied Health Practitioner(s) for Complex Neurodevelopmental Disorder (such as Autism Spectrum Disorder) or Eligible Disability Services

These allied health items provide a benefit for:

- The list of eligible disabilities can be found at MN.10.3.

- A maximum of 8 services can be claimed per patient per lifetime, including services consisting of any combination of 82000, 82005, 82010, 82030, 93032, 93033, 93040 or 93041.
- A course of assessment means up to 4 services.
- Up to 4 of these services may be provided to the same patient on the same day.
- Where a patient requires more than 4 services from the same eligible allied health provider, review and agreement is required by the referring medical practitioner before further Medicare eligible services can be claimed.

- An eligible allied health practitioner can provide up to 4 assessment services without the need for review and agreement by the referring eligible medical practitioner.
- If an eligible allied health professional has provided 4 assessment services to a patient and proposes to provide more assessment services to that patient, review and agreement from the referring eligible medical practitioner must be obtained prior.
- The referring eligible medical practitioner may specify the type of review that should be undertaken as part of the original referral. If it is not specified, an acceptable means of review includes: a case conference, phone call, written correspondence, secure online messaging exchange, or attendance with the referring eligible medical practitioner.
- The review and agreement by the referring eligible medical practitioner should be recorded by the eligible allied health practitioner in the patient notes.

For an MBS benefit to be claimed for these services, a valid referral from an eligible medical practitioner (or subsequent interdisciplinary referral) is required. The general requirements for referrals under group M10 (subgroup 1) are detailed in Note AN.15.6(<https://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&qt=NoteID&q=AN.15.6>) '*Referral requirements for allied health services*'.

- **complex Neurodevelopmental Disorders** referred by a:

- **consultant paediatrician** using items 110 to 131 of the general medical services table or items 91824, 91825, 91826 or 91836 of the Telehealth Attendance Determination.

- **eligible disability** referred by a:

- **GP** using items 3 to 47 of the general medical services table or item 91790, 91800, 91801, 91802, 91890 or 91891 of the Telehealth Attendance Determination.

(<http://www9.health.gov.au/mbs/fullDisplay.cfm?type=note&q=AN.40.1&qt=noteID&criteria=AN%2E40%2E1>).

A separate referral from the eligible medical practitioner is required for each eligible allied health practitioner providing the service. A Medicare claim must be submitted for the referring MBS service before a benefit for the subsequent referred allied health service can be paid.

Allied health practitioners should retain referrals for 24 months from the date the service was rendered for Medicare auditing purposes.

### Interdisciplinary referrals

If an eligible allied health practitioner seeks to make an interdisciplinary referral of the patient to another eligible allied health professional, this must be undertaken in consultation and agreement with, but without the need for a physical attendance by, the original referring eligible medical practitioner (such as but not limited to, a phone call, written correspondence or secure online messaging exchange). This consultation and agreement should be documented in the patient notes by the eligible allied health practitioner and included in the interdisciplinary referral. The referral may be a letter or note to an eligible allied health practitioner, signed and dated by the referring eligible allied health practitioner. There is no specific form to refer patients for these services. The referral should include a copy of the original referral by the eligible medical practitioner.

Interdisciplinary referrals will only be valid where the referring eligible medical practitioner's referral (whose original referral initiated the assessment and assisting with a diagnosis service/contribution to a treatment and management plan) remains valid.

### **Reporting requirements for assessment services**

After completion of the final assessment service by an eligible allied health practitioner, a written report must be provided to the referring eligible medical practitioner that outlines the assessment findings. Preparation of the report is not counted towards the service time under the item.

The written report must include information on:

- the assessment/s provided;
- the results of the assessment/s that may assist with diagnostic formulation or development of a treatment and management plan by the referring eligible medical practitioner; and
- if applicable, advice on further assessments that could be undertaken by other eligible allied health practitioners to assist with the referring medical practitioners' diagnostic formulation or development of a treatment and management plan by the referring eligible medical practitioner.
